

Disposal of DustCount 9000-ZX Series Products

EU Waste Electrical and Electronic Equipment (WEEE) Directive:

The European Union (EU) implemented the EU WEEE Directive 2002/96/EC and the WEEE Recast Directive 2012/19/EU requiring producers of electronic and electrical equipment (EEE) to manage and finance the collection, reuse, recycling and to appropriately treat WEEE that the producer places on the EU market after August 13, 2005. The goal of this directive is to minimize the volume of electrical and electronic waste disposal and to encourage re-use and recycling at the end of life.

Nanozen has met its national obligations to the EU WEEE Directive by registering in those countries to which Nanozen is an importer:

SPAIN

RII-AEE register number (WEEE): 10780

RII- PyA register number (Batteries): 3897

UK

ValPak membership number: M10075

WEEE Producer Number: WEE/AU4843XC

If you have purchased Nanozen DustCount 9000-ZX Series products in the EU and are intending to discard these products at the end of their useful life, please do not dispose of them with your other household or municipal waste. Nanozen has labeled its branded electronic products with the WEEE Symbol to alert their customers that products bearing this label should be returned to those facilities for returning or collecting waste electrical and electronic equipment, set up and provided by the public-sector waste disposal authorities to ensure that the waste electrical and electronic equipment is disposed of correctly. Rechargeable batteries that are not permanently installed, must be removed before disposing of the product and be disposed of separately as batteries.

For a copy of Nanozen's Selective Treatment of Waste Electrical and Electronic Equipment outlined under Articles 14 and 15 and Annex VII of the EU WEEE Directive 2012/19/EU, please contact Nanozen for WEEE Selective Treatment List and End of Life information.
